

Lecture Companion Note

Jetpack Compose

Constraint Layout

Widget package Constraint Layout	<pre> <androidx.constraintlayout.widget.ConstraintLayout android:layout_width="match_parent" android:layout_height="match_parent"> <Button android:id="@+id/buttonSubmit" android:layout_width="wrap_content" android:layout_height="wrap_content" android:text="Submit" app:layout_constraintStart_toStartOf="parent" app:layout_constraintEnd_toEndOf="parent" app:layout_constraintTop_toTopOf="parent" app:layout_constraintBottom_toBottomOf="parent" /> </androidx.constraintlayout.widget.ConstraintLayout> </pre>
Compose package Constraint Layout	<pre> import androidx.constraintlayout.compose.ConstraintLayout @Composable fun ComplexConstraintExample() { ConstraintLayout(modifier = Modifier.fillMaxSize()) { // Create references for the composables inside the ConstraintLayout val (buttonSubmit) = createRefs() Button(onClick = { /* Action */ }, modifier = Modifier.constrainAs(buttonSubmit) { // Connect the anchors of the element to the parent anchors top.linkTo(parent.top) bottom.linkTo(parent.bottom) start.linkTo(parent.start) end.linkTo(parent.end) }) { Text("Submit") } } } </pre>

Dependency : Compose's ConstraintLayout is not bundled inside the core foundation artifact layout library.

Kotlin script

implementation("androidx.constraintlayout:constraintlayout-compose:1.1.0")

Composable functions naming conventions

Use Pascal case (first letter of each word is capitalized)

A noun: **DoneButton()**

NOT a verb or verb phrase: **DrawTextField()**

NOT a nouned preposition: **TextFieldWithLink()**

NOT an adjective: **Bright()**

NOT an adverb: **Outside()**

Nouns MAY be prefixed by descriptive adjectives: **RoundIcon()**
