102

University of Colombo School of Computing

BACHELOR OF SCIENCE IN INFORMATION SYSTEMS

Second Year Examination - Semester I - UCSC AY22 [held in September/ October 2025]

IS2206 — Business Process Management

(Two (2) Hours)

Answer ALL questions

Number of Pages = 12

Number of Questions = 4

To be completed by the candidate

Index Number:

--	--	--	--	--	--	--	--

Important Instructions to Candidates:

- I. Students should answer in the medium of the English language only, using the space provided in this question paper.
- II. Note that questions appear on both sides of the paper. If a page or a part of this question paper is not printed, please inform the supervisor immediately.
- III. Write your index number CLEARLY on every page of this Question paper.
- IV. This paper consists of 4 questions in 12 pages (including the Cover Page).
- V. Answer ALL questions in the space provided.
- VI. Programmable Calculators and any electronic device capable of storing and retrieving text, including electronic dictionaries, smartwatches and mobile phones, are not allowed.
- VII. Do not tear off any part of this answer book. Under no circumstances may this book, used or unused, be removed from the Examination Hall by a candidate.

Question 01 (Total 25 Marks)

- 1) How does the definition of a business process ensure both coordination and goal achievement in an organization? [2 marks]

- 2) Why does Michael Hammer claim that “every good process eventually becomes a bad process”? [2 marks]

- 3) Why is process identification considered the foundation of Business Process Management (BPM)? [2 marks]

- 4) Contrast continuous process improvement with business process re-engineering in terms of scope and risk. [2 marks]

- 5) Briefly explain two (02) modern Business Process Management (BPM) trends. [2 marks]

- 6) Why might the same outcome deliver different value to different customers? Explain using a suitable example. [3 marks]

Index Number:

- 7) Briefly explain the stages of Business Process Management (BPM) life cycle. [6 marks]

Index Number:

- 8) Differentiate between core, support, and management processes using an example from a university setting. [6 marks]

Question 02 (Total 25 Marks)

- 1) Compare the roles of events and decision points in shaping the flow of a process. [02 marks]

- 2) Why are sub-processes considered processes in their own right despite being part of a larger process? [02 marks]

- 3) How does an inclusive gateway differ from exclusive and parallel gateways? [02 marks]

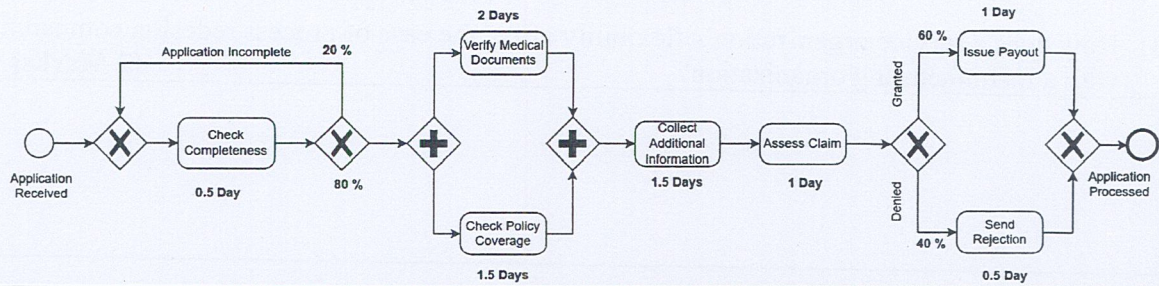

- 4) Differentiate between private and public processes in BPMN with an example. [04 marks]

- 5) Convert the simple verbal description below into an As-Is process model using BPMN. Clearly indicate the BPMN elements and state any assumptions you have made. [15 marks]

A customer initiates a vehicle rental by choosing a vehicle and specifying whether they require a driver or not. If the request is without a driver, the system receives the request and displays available options with prices. If the customer chooses a vehicle with a driver, the request is received by an admin, who then selects a driver and checks their availability. The driver receives the request and, if available, confirms it, after which the system shows the customer the available options and prices. The customer then decides whether to proceed with the rental. If they choose not to proceed, the process ends. If they proceed but do not have sufficient funds for the deposit, they may negotiate for a lower price. Upon admin approval of the reduced price, the customer is prompted to make a payment and upload the receipt. The company then checks the bank slip; if the payment is valid, the rental is confirmed and the customer is notified. If the payment is invalid, the customer is refunded. Once confirmed, the customer receives the final confirmation, completing the rental process.

Question 03 (25 Marks)

1) Calculate the cycle time for the diagram below. Clearly state each step. [5 Marks]

2) Why does the “Devil’s Quadrangle” make process redesign inherently difficult? [2 Marks]

Index Number:

- 3) How does a service organization's flexibility affect the ease of process redesign compared with a manufacturing organization? [2 Marks]

- 4) Discuss why a clean-slate redesign approach entails higher risk than improving the existing process. [2 Marks]

- 5) Briefly explain why a worklist handler is essential in BPMS architecture. [2 Marks]

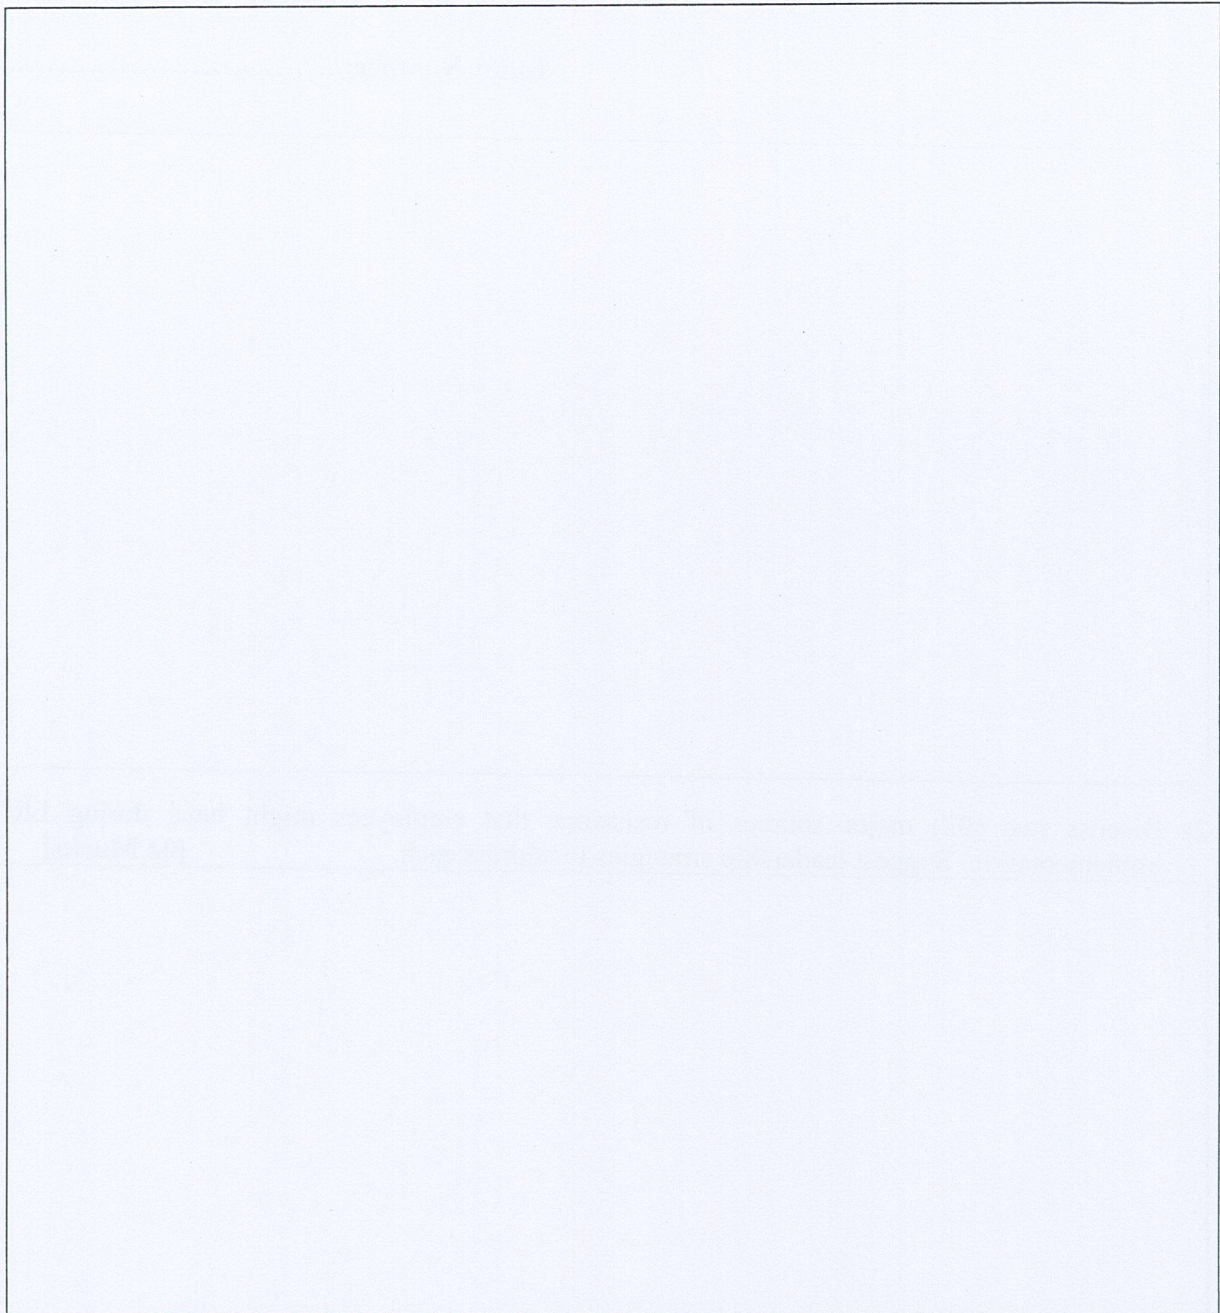

- 6) Using an example, explain why integration with external services is necessary in many BPMS solutions. [2 Marks]

- 7) Why might migrating legacy data be one of the hardest challenges in adopting a BPMS? [2 Marks]

- 8) Briefly explain how KPIs and benchmarks complement each other. [2 Marks]

- 9) Differentiate Benchmarking vs competitor research in terms of Scope, purpose and approach. [6 Marks]

Question 04 (25 Marks)

Your company has decided to replace its outdated finance and HR systems with a new Enterprise Resource Planning (ERP) system. Leaders say this will boost efficiency and integration across departments, but many employees fear the system will be too complex, create extra workload, and require difficult retraining. Answer the following questions based on this scenario.

- 1) Explain the urgency behind adopting an ERP system. What risks exist if the company continues with the old systems? Identify at least three (03) factors. **[3 Marks]**

Index Number:

- 2) Discuss two (02) major sources of resistance that employees might have during ERP implementation. Suggest leadership strategies to address each. **[04 Marks]**

- 3) Propose one (01) realistic quick win during ERP implementation. Explain how this small success could build momentum for wider adoption. **[2 Marks]**

Index Number:

- 4) Briefly explain two(02) measures leaders could use to anchor ERP adoption into organizational culture so that it becomes the “new normal.” **[2 Marks]**

- 5) Using Lewin’s Unfreeze-Change-Refreeze model, explain how leaders could guide employees through the ERP transition. Identify at least two (02) actions in each stage. **[6 Marks]**

Index Number:

- 6) Apply Force Field Analysis to this ERP scenario. Identify at least three (03) driving forces and three (03) restraining forces, and suggest two (02) methods which leaders could use to strengthen the drivers or weaken the restrainers. **[8 Marks]**
